

AHURUEZENMA DAVIDSON CHIEMEZUO

AI Engineer | Agentic AI Developer

Abuja, Nigeria | +234 906 150 5041 | ahuruezenmadavidson@gmail.com | github.com/DavidGasol |
linkedin.com/in/davidson-ahuruezenma-33a773294 | david.dgi.qzz.io

PROFESSIONAL SUMMARY

AI Engineer with 2+ years building production multi-agent systems and automation pipelines using Claude Code, n8n, and RAG architecture. Skilled in multi-LLM orchestration, vector-based retrieval systems, and production reliability engineering - including retry logic, circuit breakers, and dual-channel alerting. Foundation in Sociology & Anthropology brings a human-centric lens to building intelligent systems that work for people. Open to remote AI Developer / AI Automation roles.

CORE SKILLS

- AI Engineering: Claude Code, multi-agent orchestration, RAG systems, vector embeddings, prompt engineering, multi-LLM integration, Model Context Protocol (MCP), LangChain/LangGraph, CrewAI/AutoGen, AI agent evaluation
- Tools: Python, n8n, SQL/PostgreSQL/MySQL, Supabase, AWS (S3, CLI, CloudWatch), Git/GitHub, REST APIs, Webhooks
- Data & Governance: GDPR, NDPR, ISO 27001, Privacy Impact Assessments, technical documentation, systems design
- Remote: self-directed ownership, async communication, client requirements gathering, cross-functional docs

EXPERIENCE

Freelance AI Automation Specialist - Independent Contractor

2024 - Present

Clients: Zenko Limited, Theldoforce (Security Services), DGI Integrated Services

- Sole technical owner of three production automation systems: lead generation (webhook to Excel backup to Python validation to Gemini personalization to Supabase to email), operations & personnel alerting (Telegram/Gmail/WhatsApp with AI role-tiering), and AWS error monitoring.
- Productionized a reusable reliability framework: automatic retry with exponential backoff, circuit-breaker pausing on repeated failures, and dual-channel alerting with exact failed-step context.
- Orchestrated a personal multi-agent development environment coordinating Claude Code with complementary coding agents.

AI Engineer - ViZO Technology Limited

April 2024 - Present

- Architected a production RAG system integrating vector embeddings for semantic search across organizational knowledge bases.
- Designed and implemented AI automation workflows across operational functions, delivering adoption and ROI recommendations to leadership.
- Integrated RAG patterns with Supabase-backed storage and n8n orchestration for repeatable AI pipelines.
- Documented data governance and AI workflows aligned with NDPR, GDPR, and ISO 27001; trained teams on responsible AI use.

AWS Cloud & Automation Intern - DGI Integrated Services

May 2023 - April 2024

- Automated cloud infrastructure provisioning and monitoring using AWS Management Console and CLI.
- Designed structured data ingestion pipelines supporting tooling and dataset versioning.
- Deployed fault-tolerant, scalable AWS S3 storage architectures.

FEATURED PROJECTS

AI-News-Update

Fully automated daily AI news digest (cron-fetched, cross-day dedup, email delivery, live Vercel dashboard).

github.com/DavidGasol/AI-News-Update | ainl.vercel.app

HealthRAG

Nigeria-first synthetic-only health triage prototype with rule-first emergency detection and grounded RAG answers.

github.com/DavidGasol/HealthRAG

VIZO-RAG System

Source-grounded RAG assistant: ChromaDB vector search, Hugging Face embeddings, Gemini-backed answers.

github.com/DavidGasol1/VIZO-RAG

financial-statement-pipeline

OCR + extraction pipeline for scanned Nigerian financial statements with full test suite.

github.com/DavidGasol1/financial-statement-pipeline

Job-Agent

Production-hardened AI job-application agent (FastAPI, LangGraph, OAuth-secured Chrome extension, 111 tests).

github.com/DavidGasol1/Job-Agent

R-Medy

Natural health solutions web app: Next.js, AI lead capture, secure webhooks.

github.com/DavidGasol1/R-Medy | rmedy.qzz.io

N8n-Automation

AI automation workflows with Gemini and Telegram.

github.com/DavidGasol1/N8n-Automation

CERTIFICATIONS

- Claude Code 101 - Anthropic Education (2026)
- Introduction to Subagents - Anthropic Education (2026)
- Introduction to Agent Skills - Anthropic Education (2026)
